**No visible bow wave should form!**

## Prerequisites:

### Tyres:

Vehicle weight, tyre width and required tyre pressure are all related. Therefore, the **required inflation pressure of the authorized tyres** is: **max. 4 bar**

**If the tyres need to be adapted:**  
approval by the vehicle manufacturer is necessary!

## General framework:

### Driving mode:

- max. speed = half walking speed (about 2 km/h)
- no abrupt steering actions, do not steer while standing still
- slow acceleration and gentle braking

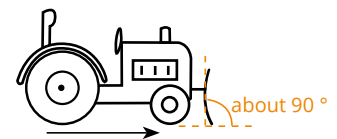

**The mat edges must be protected at the beginning and at the end of the alley!**

## Mobile manure removal:

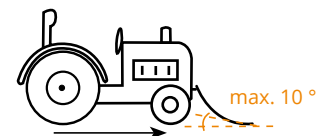

- the cleaning blade edge must be equipped with a rubber lip
- operation only with lowest resting pressure
- the cleaning blade is positioned either vertically or very flat on the surface

either:

or:

## Especially for MONTA:

MONTA can be driven on **up to max. 10 % slope** with standard equipment such as farm yard loader or tractor.

### Notice:

- only drive straight / do not steer any radius
- do NOT accelerate or brake on the mat
