

Perforated mat for elevated calf pens

The perforated ground in calf pens is usually hard and often slippery. However, calves need a slip-resistant ground that is gentle on their joints. The soft-elastic perforated rubber mat CaBoMat improves slip resistance and reduces the risk of injury. It thus provides an animal-friendly floor for young calves. In addition, the amount of bedding can be reduced.

- Proven, low maintenance pebbled surface
- For load-bearing, perforated ground
- Potential savings on bedding, especially in the summer months

Technical Data

Dimensions (mm / cm)	Thickness	Width	Length
Standard	12 mm	100 / 110 / 120 cm	70 - 220 cm (in 1-cm increments)
Width options (min. quantity: 30 pcs.)		75 cm / 76 - 118 cm (in 2-cm increments)	

Dimensions (in / ft)	Thickness	Width	Length
Standard	½"	39 ¾ / 43 ¼ / 47 ¼"	27 ½ - 86 ⅝ cm (in ⅜" increments)

Dimensions (in / ft)	Thickness	Width	Length
Width options (min. quantity: 30 pcs.)		29 ½ / 30 - 46 ½" (in ¾" increments)	

Perforation	Diameter
	30 mm / 1 ¼"
	(width of unperforated border differs)

Floor prerequisites
The substructure is perforated (bearing bars) and the load-bearing capacity is ensured, as the mat does not have a static function.
The maximum distance between the bearing bars is 5 x 5 cm / 2 x 2" and the minimum width of the bearing bars is 3 mm / ⅛".

Installation and fixing
Lay mats without fixing

Please refer to the relevant KRAIBURG specifications and installation instructions, which provide valuable hints and tips.
