

### The elastic rubber brisket board

Rubber brisket boards – designed as gentle limitation in the free stall – enable comfortable lying with free space to the front and perfectly complement the control devices of the free stall. ergoBOARD is ca. 18 cm high, extremely elastic and ergonomically shaped. The pleasantly soft mat allows cows to adopt natural lying positions, for example with an outstretched foreleg. This also puts less strain on carpal joints when getting up. ergoBOARD is suitable for free stall widths greater than 115 cm and can be combined with various lying mats. ergoBOARD is installed in front of the lying mat and can, as a result, also be easily retrofitted.

- Very elastic
- Enables comfortable, natural lying and protects the carpal joints when standing up
- Can be easily retrofitted
- For free stall widths greater than 115 cm

### Technical data

Dimensions	Height	Depth	Length
ergoBOARD	185 cm	9 cm	115 / 120 cm

### Installation and fixing

**5 fixings / piece** Prefabricated fixing points facilitate installation.
