

Slatted flooring for higher loads

The slatted flooring LOSPA swiss is made to measure for every slatted floor geometry. Large-area mats extending over several slatted floor elements and our proven fixing system with extra strong rubber pegs ensure outstanding dimensional and form stability. As a simple solution for renovation projects, it is a quick and easy way to meet legal standards. LOSPA swiss ensures your slatted floor is cattle friendly, thereby promoting their health and natural behavior.

- For every slatted floor geometry above an animal weight of 250 kg
- Reinforced surface for high loads
- Flexible single mats with elastic fixing
- Compliance with standard DIN 3763: Sufficiently soft or elastically deformable within the meaning of the new German Animal Protection - Livestock Ordinance (TierSchNutztV) (DIN class 1)

Technical data

Dimensions	Thickness	Width	Length
LOSPA swiss	20 mm / ¾"	Custom-made	Custom-made

Floor prerequisites	Slit width	Tread width
	From 30 mm / 1 ¼"	Up to 140 mm / 5 ½"

Floor prerequisites

Slit width

Tread width

(We recommend LOSPA SB for wider treads)

The mats are made to dimension by our specialists drawing upon many years of real-world experience. Stability also plays a key role in this.
In addition to the slit and tread width in the slatted floor, feeding, aeration, occupation, etc. are essential for ensuring clean floors.

Application area

For every slatted floor geometry

Fattening cattle and young cattle in pen husbandry

KURA SB or KURA S can be used for young cattle weighing up to 250 kg (or up to 350 kg if the animals are kept in the same pen for the entire fattening/breeding period).

Installation and fixing

Installation and fixing
[Installation instructions](#)

The mats are fixed in the slots with special fixing elements.

KRAIBURG fixing system: Optimized rubber peg with surrounding rim: Prevents lateral slipping – flush with the mat

Compatibility with vehicle traffic

LOSPA can be driven over with common equipment such as a yard loader or tractor with approved pneumatic tyres at prescribed air pressure up to max. 4 bar.

(Note: drive with necessary caution and steer in large radii!)

Maintenance tip

Maintenance tip

Keep slatted flooring as clean as possible Essential for hoof health and slip resistance!

Treatment with a high-pressure cleaner and standard cleaning agents possible.

KRAIBURG warranty

5 years

Detailed information on our warranty (with consideration of the service life) is available upon request from your contractual partner / dealer.

Tolerances

Thickness: +3/-2 mm

Width + length: +/- 1.5% (DIN ISO 3302-1 tolerance class M4)

Please refer to the relevant KRAIBURG specifications and installation instructions, which provide valuable hints and tips.

Note on imperial measurements: Our products are manufactured according to metric specifications. The imperial measurements are therefore only intended as a guide. Inaccuracies may occur due to conversion and rounding.

Full covering of pens pays off!

In order to reduce injuries and enable all animals to behave fulfilling their needs **we recommend full covering of the pen with rubber.**

In the case of partial covering with rubber:

Lower ranking animals are easily pushed off. This is particularly true where the complete lying area cannot be used as such because the animals in the feeding place stand with their hind legs on the mats of the lying area.

Important: When feeding, the animals should stand on the mat **either completely or not at all!** This is also important for long-term functionality.

Planning aid for feeding place depth:

- Pre-fattening: ca. 1.70 m
- Fattening: ca. 1.80 m
- Finishing: ca. 1.90 m

The dimensions may vary depending on the breed.
